Relationships and Sexual Health

Findings from the Health Related Behaviour Survey 2026

Supporting the health of children and young people in Wolverhampton

wolverhampton.gov.uk

CITY OF WOLVERHAMPTON COUNCIL

INTRODUCTION

The Health Related Behaviour Survey (HRBS) has been running in Wolverhampton since 2006. The survey is carried out as a way of consulting with children and young people and collecting robust information about young people's health and wellbeing. The HRBS is commissioned by the Public Health team within the City of Wolverhampton. It is implemented by the Schools Health Education Unit (SHEU) which has conducted the survey on behalf of the Council since its inception in 2006.

The survey is conducted with children and young people across Wolverhampton, who are asked to complete an anonymous on-line version of the survey appropriate for their age group. Schools are supported to collect the most reliable data with pupils in Years 2 (Key Stage 1 survey), 4 & 6 (Key Stage 2 survey), and 8 & 10 (Secondary Key Stage 3-4 survey) with other year groups taking part where appropriate. In the 2026 survey schools could also opt for a Year 7 version and a Year 12 version of the secondary survey.

HRBS 2026 was completed by a total of 12942 pupils in 23 primary (Key Stage 1) settings, 57 primary (Key Stage 2) settings, 16 secondary (Key Stage 3-4) settings, 3 institutions completed the Year 12+ survey, and 9 institutions took part in the SEND survey. Some schools chose to survey additional year groups, the full sample size can be found at the back of this report.

Themed Report No. 2 of 5

1. Healthy Lifestyles
2. **Relationships and Sexual Health**
3. Smoking, Substances and Gambling
4. Emotional Health and Wellbeing
5. Safety (including Bullying)

NAVIGATING THE REPORT

The report is one of five that reflect local priorities. Each report is divide into the following sections:

Headlines

Each report contains headline bullet points, comparing the 2026 data to previous years (where available).

- Positive finding
- Negative finding
- Neutral finding (where it is subjective as to whether the finding is positive or negative or is little different)

Trends

The survey questions have changed somewhat compared with previous years but where possible, trend charts have been included to provide useful insight for key priority areas.

Phase Differences

A selection of questions used across the surveys has been presented to look for age-related differences in responses.

Mapping

Where postcode data was available, school survey responses were mapped against wards using pupils' home postcodes. Due to limited postcode data, secondary school responses could not be mapped at ward level.

Links Between Behaviours

Cross tabulations have been investigated for some of the key questions in the survey to look for links between behaviours. Each statement is a statistically significant finding; to save space, only two from the secondary survey have been selected but full lists are available.

Inequalities

Selected questions from the primary and secondary questionnaires were analysed to explore differences in responses between demographic and potentially vulnerable groups.

HEADLINES

KS2 pupils in 2026 are more likely to say they know enough about body changes and growing up. They are also more likely to know how to contact their school nurse.

After a peak following covid (2022) where 28% of Year 5/6 girls said they had started their periods, there appears to be a downward trend, 22% of girls said this in 2026.

For KS3-4 pupils, there continues to be a downward trend for knowledge of STIs including chlamydia and where to access free condoms.

There appears to be a to be a fall in Year 10 pupils having experience of sexualised comments/banter and also a fall in reports of them seeing unwanted sexual images.

The impact of social media on children and young people is widely debated. In Wolverhampton, 21% of KS1 pupils said they go online to chat, for example using WhatsApp, and 12% said they use social media.

Among Year 5 and Year 6 pupils, 66% said they used social networking sites in 2026, down from 73% in 2024. KS3-4 pupils, however, appear more likely to use social media in 2026 than in 2024 (87% vs. 69%).

Key Stage 1 Pupils

- 37% of Key Stage 1 pupils in 2026 said they worry ‘a lot’ about friendships compared with 35% in 2024 and 38% in 2022. 32% of Key Stage 1 pupils said they have been left out by friends in the week before the survey, compared with 35% in 2024 and 31% in 2022.
- 75% of Key Stage 1 pupils said that they know an adult they can talk to if they are worried. This compared with 73% in 2024 and 78% saying this in 2022.
- 69% of Key Stage 1 pupils said that they have lots of friends to play with. This is slightly lower than the 71% seen in 2022 and the 72% seen in 2018.
- 47% of Key Stage 1 pupils in 2026 said that they spend time at playtimes as a playground pal/buddy. This compared with 51% in 2024 and 58% seen in 2022.
- 21% of Key Stage 1 pupils in 2026 said they go online for chatting e.g. WhatsApp. 12% of pupils said that use social media (e.g. Facebook, Instagram).

Key Stage 2 Pupils

- 35% of Year 6 pupils in 2026 said that they know how to contact the school nurse. This is higher than the 29% in 2024, 28% in 2022 and the 25% reported in 2018.
- 80% of Year 5 and Year 6 pupils said that they have got helpful information about growing up and body changes from their parents. This compares with 76% in 2024 and 75% seen in 2022.
- 49% of Year 5 and Year 6 pupils in 2026 said that they have got helpful information about growing up and body changes from their School Nurse compared with 32% in 2024 and 39% in 2022. 57% reported this in 2018.
- 66% of Year 5 Year 6 pupils in 2026 said that they use social networking sites such as Snapchat, Facebook, Twitter or WhatsApp compared with 73% in 2024.
- 57% of pupils in 2026 and 2024 said they have found the information and advice they have been given in school about relationships, growing up and body changes 'quite useful' or 'very useful'. This is similar to the 58% seen in 2022 but higher than the 53% reported in 2018.
- 48% of pupils in 2026 and 2024 said that know enough about body changes and growing up. This is higher than the 44% in 2022. 64% of pupils in 2026 said that they feel happy about growing up and body changes. This compared with 62% in 2024 and 66% reported by pupils in 2022.
- 22% of girls in Year 5 and 6 said that they have started their periods. This compared with 23% in 2024 and 28% in 2022. 10% reported this in 2018.
- 29% of Key Stage 2 said that they worry at least 'quite a lot' about falling out with friends. This is lower than the 34% see in 2022 but higher than the 27% of pupils saying this in 2018.

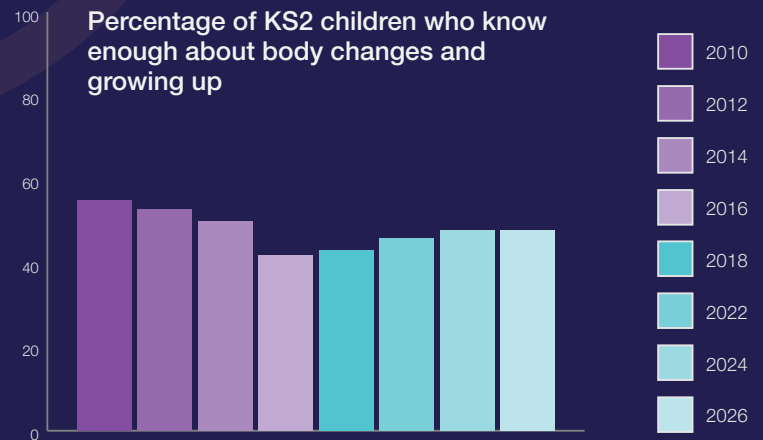

Key Stage 3-4 Pupils

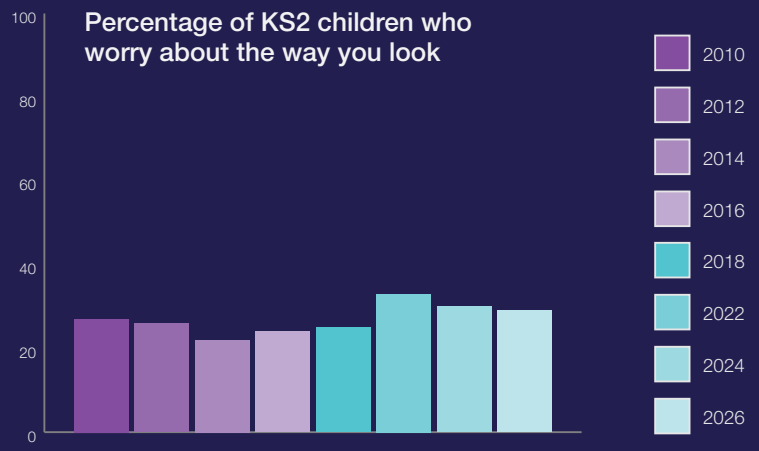

- 26% of Key Stage 3-4 secondary pupils in 2026 said they have experienced at least one of the controlling behaviours listed by a current or previous boyfriend/girlfriend. This is lower than the 29% seen in 2024, and the 27% reported in 2022 and 2018. The most commonly reported behaviour reported by Key Stage 3-4 pupils were being 'angry or jealous when I wanted to spend time with friends' (19%), 'used hurtful or threatening language to me' (14%) and 'kept checking my phone' (14%).
- 8% of Year 10 pupils in 2026 said that in school they have experienced sexualised comments/banter offline compared with 11% in 2024, (6% of Year 10 pupils said this happened outside school).
- 4% of Year 10 pupils in 2026 said that in school they have experienced someone showing them sexual images they didn't want to see compared with 6% in 2024, 8% (10% in 2024) said this happened outside school.

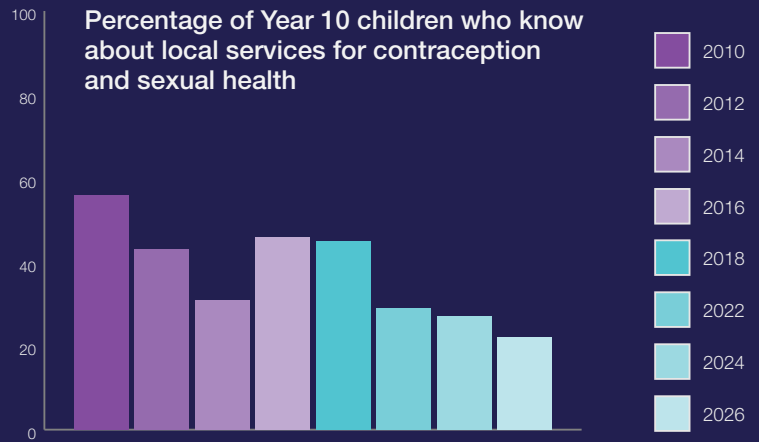

- 26% of Key Stage 3-4 pupils in 2026 said that their school challenges homophobic bullying. This is higher than the 23% seen in 2024.
- 8% of Key Stage 3-4 secondary pupils in 2026 said they have been to see their school nurse for advice and support. This is lower than the 12% in 2024 and the 10% seen in 2022.
- 26% of Key Stage 3-4 secondary pupils in 2026 said that they would like to be able to get contraception from the School Nurse. This is lower than the 29% seen in 2024 and 2022, the 37% in 2018 and 42% who said this in 2016. The top places Key Stage 3-4 secondary pupils said they would like to be able to get contraception included the GP/doctor (65%) pharmacy (48%) and 'Sexual Health Services E.g. Embrace' (30%).
- 7% of Year 8 and 15% of Year 10 pupils in 2026 said that they know they can get Emergency Hormonal Contraception (EHC) for free. 33% of Year 12+ students said the same.
- 6% of Year 10 pupils in 2024 said that they have had sex. 24% of Year 12+ students said the same.
- 59% of Key Stage 3-4 pupils in 2026 said that one of the most important aspects of the sexual health service was that it should be private and confidential. This is lower than the 65% who said this in 2024.
- Key Stage 3-4 secondary pupils in 2026 were less likely to say that they know about chlamydia compared with previous years. 32% said this in 2026 compared with 40% in 2024 and 51% in 2018.
- 37% of Key Stage 3-4 secondary pupils in 2026 said that they know when their School Nurse is available. This is lower than the 45% seen in 2024 but still higher than the 34% in 2022 and the 27% who said this in 2018.
- 26% of Key Stage 3-4 secondary pupils in 2026 said they know where they can get condoms free of charge. This continues a downward trend from 29% in 2024, 28% seen in 2022, 39% in 2018 and the 42% of pupils who said this in 2016.
- 40% of Key Stage 3-4 secondary pupils in 2026 said they know about the contraceptive injection. This continues a downward trend: 41% in 2024, 42% in 2022, 47% in 2018 and the 53% of pupils who said this in 2016.
- 40% of Key Stage 3-4 pupils in 2026 said they have received helpful information from parents/carers about sexual health and relationships compared with 41% in 2024 and 45% saying this in 2022.
- 87% of Year 8 and Year 10 secondary pupils in 2026 said that they use social networking sites compared with 69% in 2024.

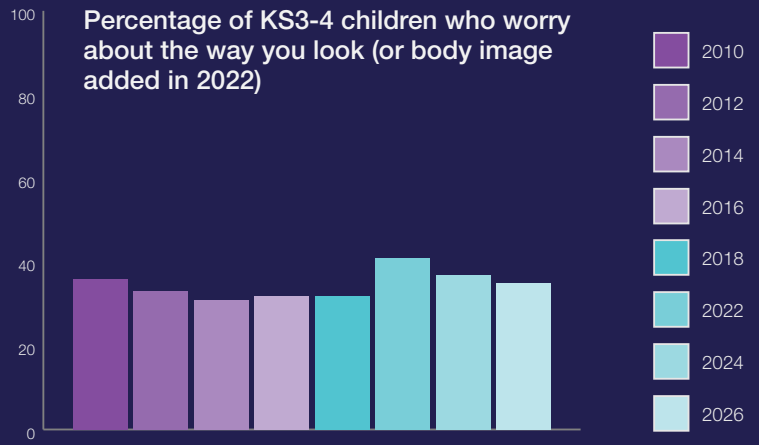

TRENDS

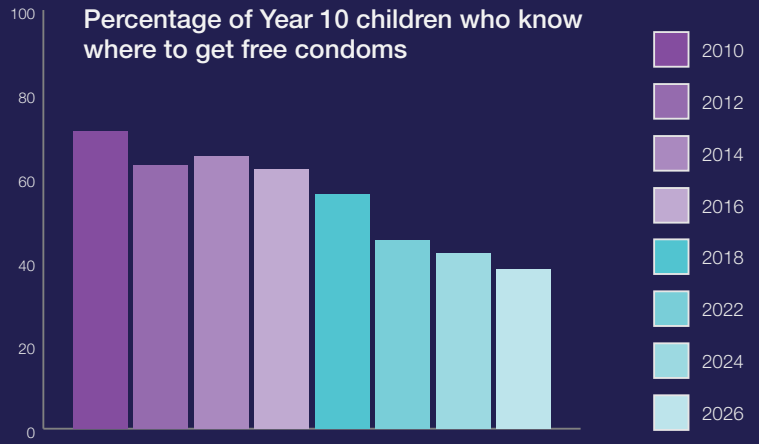

- There is a clear downward trend for Key Stage 3-4 secondary aged pupils who know where to get condoms free of charge. 71% of Year 10 pupils said this in 2010 and 38% said the same in 2026.

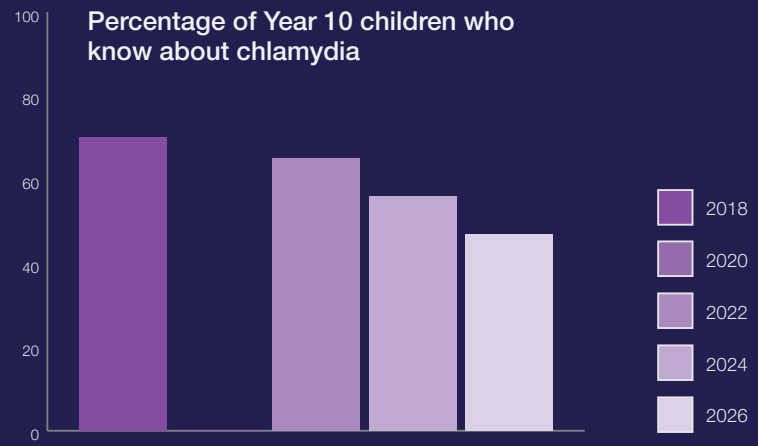

- Until 2024, there has been an increase in pupils knowing when the School Nurse is available (45% 2024; 35% 2023; 27% 2022) This has fallen in 2026 to 37%. The same is true of awareness of the ChatHealth service offered by School Nursing (21% 2026; 27% 2024; 20% 2022).
- There seems to have been a downward trend by Y10 in awareness / knowledge around some STIs and preventative forms of contraception e.g.:

  Y10 know about Chlamydia (47% 2026; 56% 2024; 65% 2022; 70% 2018)

  Y10 know about HIV / AIDS (69% 2026; 74% 2024; 81% 2022; 83% 2018)

  Y10 know about contraceptive pill (74% 2026; 74% 2024; 83% 2022; 84% 2018)

  Y10 know about contraceptive injection (58% 2026; 53% 2024; 63% 2022; 68% 2018)

MAPPING

Percentage of Year 6 pupils by ward who have had helpful information about puberty from teachers

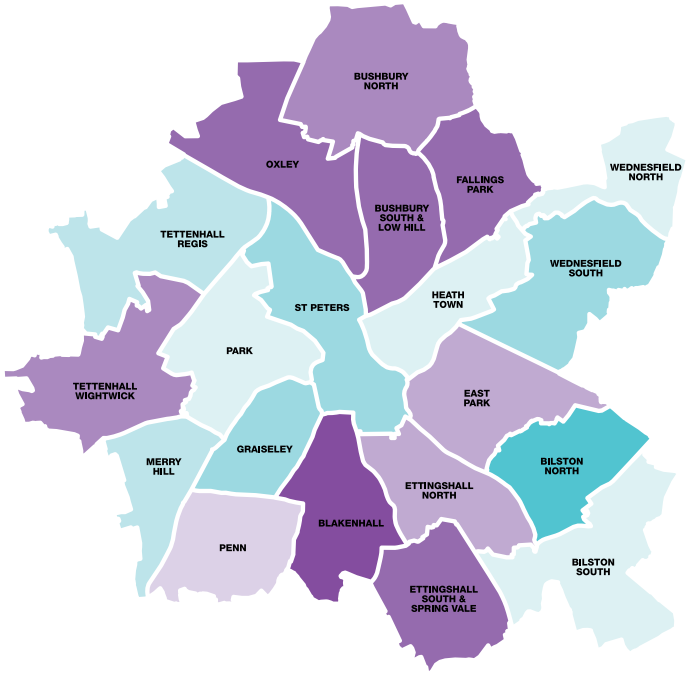

- 71.5% – 73.5% Wednesfield North, Oxley
- 73.5% – 75.6% Park
- 75.6% – 77.6% Tettenhall Regis, Bushbury South & Low Hill, Ettingshall South & Spring Vale
- 77.6% – 79.6% Penn
- 79.6% – 81.6% Bushbury North, East Park, Ettingshall North, Bilston North
- 81.6% – 83.6% None
- 83.6% – 85.6% Tettenhall Wightwick, Merry Hill, Graiseley, Blakenhall
- 85.6% – 87.6% Fallings Park, St Peter's
- 87.6% – 89.7% Bilston South
- 89.7% – 91.7% Heath Town, Wednesfield South

Percentage of Year 6 pupils by ward who have had helpful information about puberty from visitors in lessons

- 24.6% – 28.0% Penn
- 28.0% – 31.4% Fallings Park, Blakenhall
- 31.4% – 34.8% Tettenhall Wightwick, Merry Hill, Bilston North
- 34.8% – 38.1% Tettenhall Regis, Graiseley, Ettingshall North
- 38.1% – 41.5% Bushbury North
- 41.5% – 44.9% Ettingshall South & Spring Vale
- 44.9% – 48.3% Bilston South
- 48.3% – 51.6% Park, St Peter's, East Park, Wednesfield North
- 51.6% – 55.0% Oxley, Heath Town, Wednesfield South
- 55.0% – 58.4% Bushbury South & Low Hill

Percentage of Year 6 pupils by ward who know how to contact the school nurse

- 22.6% – 25.4% Blakenhall
- 25.4% – 28.3% Oxley, Bushbury South & Low Hill, Fallings Park, Ettingshall South & Spring Vale
- 28.3% – 31.1% Bushbury North, Tettenhall Wightwick
- 31.1% – 34.0% Ettingshall North, East Park
- 34.0% – 36.9% Penn
- 36.9% – 39.7% Park, Heath Town, Bilston South, Wednesfield North
- 39.7% – 42.6% Tettenhall Regis, Merry Hill
- 42.6% – 45.4% St Peter's, Graiseley, Wednesfield South
- 45.4% – 48.3% None
- 48.3% – 51.1% Bilston North

Percentage of Year 6 pupils by ward who have had helpful information about puberty from the school nurse

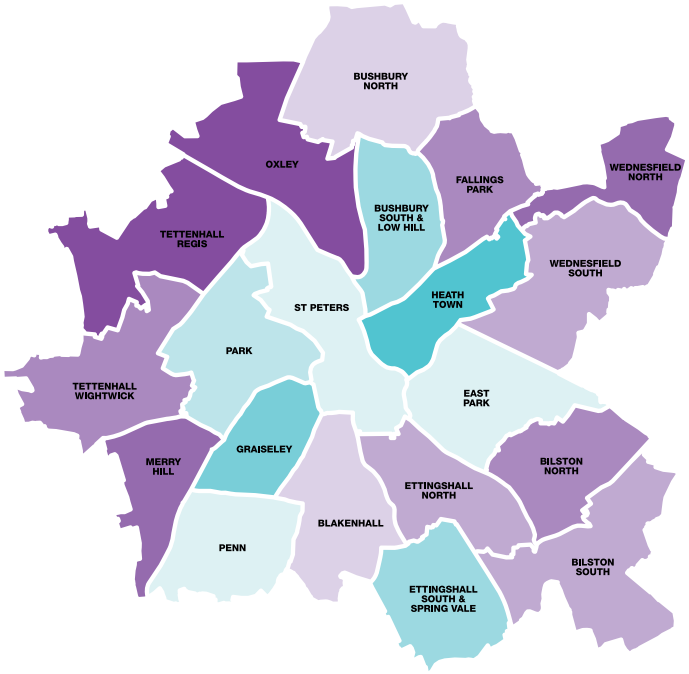

- 21.4% – 27.7% Penn, Blakenhall, Ettingshall South & Spring Vale
- 27.7% – 34.1% Fallings Park
- 34.1% – 40.4% Ettingshall North
- 40.4% – 46.7% Tettenhall Wightwick
- 46.7% – 53.0% Tettenhall Regis, Merry Hill, Graiseley
- 53.0% – 59.3% East Park, Bushbury North
- 59.3% – 65.7% Park
- 65.7% – 72.0% Oxley, Wednesfield North, Bilston North
- 72.0% – 78.3% Wednesfield South, St Peter's, Heath Town, Bushbury South & Low Hill
- 78.3% – 84.6% Bilston South

Percentage of Year 6 pupils by ward who know enough about how their body changes as they get older

- 48.8% – 50.5% Graiseley
- 50.6% – 52.3% Bushbury South & Low Hill
- 52.3% – 54.0% Wednesfield North, Tettenhall Regis
- 54.0% – 55.8% Ettingshall North
- 55.8% – 57.5% Oxley, Park, Blakenhall
- 57.5% – 59.3% Fallings Park, Heath Town, Tettenhall Wightwick, Bilston North
- 59.3% – 61.0% Wednesfield South, East Park, Ettingshall South & Spring Vale
- 61.0% – 62.8% Penn, Merry Hill
- 62.8% – 64.5% Bushbury North, St Peter's
- 64.5% – 66.3% Bilston South

Percentage of Year 6 girls who have started their periods

- 14.8% – 16.9% Oxley, Tettenhall Regis
- 16.9% – 19.0% Merry Hill, Wednesfield North
- 19.0% – 21.1% Bilston North, Fallings Park Tettenhall Wightwick,
- 21.1% – 23.2% Wednesfield South, Bilston South, Ettingshall North
- 23.2% – 25.4% Bushbury North, Blakenhall
- 25.4% – 27.5% East Park, St Peter's, Penn
- 27.5% – 29.6% Park
- 29.6% – 31.7% Bushbury South & Low Hill, Ettingshall South & Spring Vale
- 31.7% – 33.8% Graiseley
- 33.8% – 35.9% Heath Town

LINKS BETWEEN BEHAVIOURS

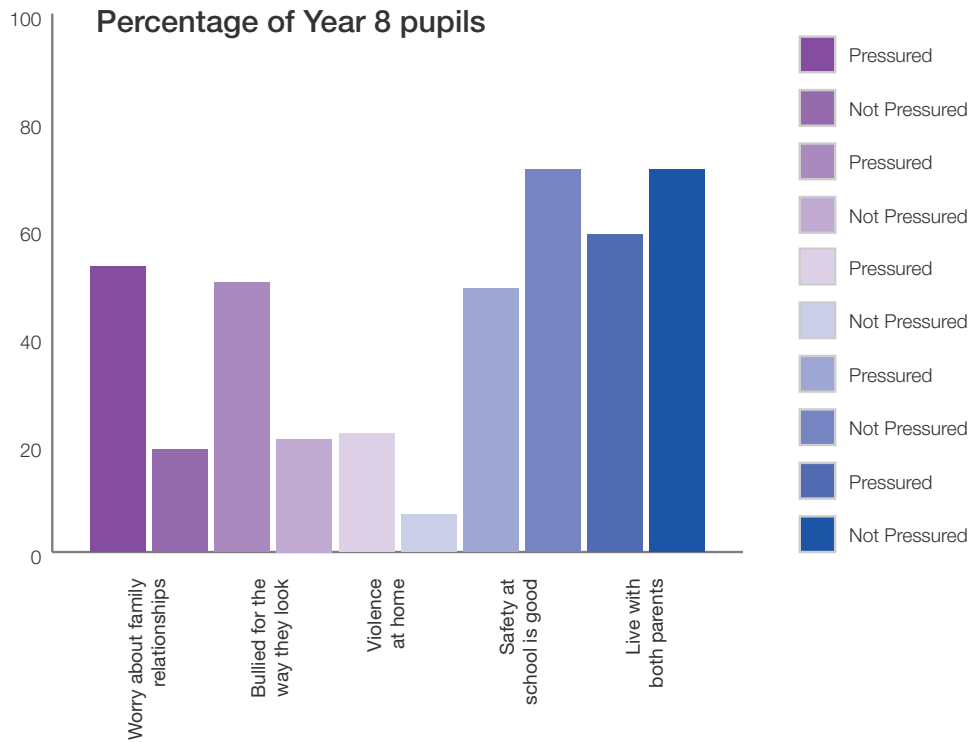

When compared with Year 8 pupils who said they haven't been pressured by a partner, Year 8 pupils who said that they have been pressured by a partner to do something they didn't want to do are:

Significantly more likely to:

- Worry about family relationships
- Have been bullied for the way they look
- Experience violence or abuse at home at least once or twice in the last month

Significantly less likely to:

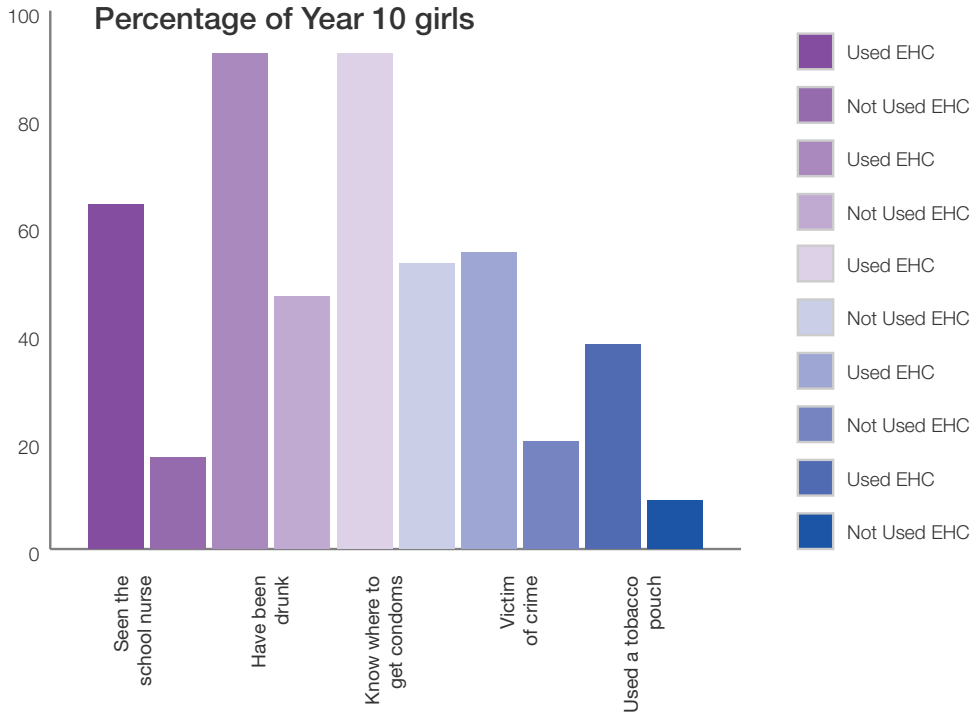

- Say safety at school is good
- Live with both parents together

When compared with Year 10 who haven't used emergency hormonal contraception, Year 10 pupils who have used emergency hormonal contraception are:

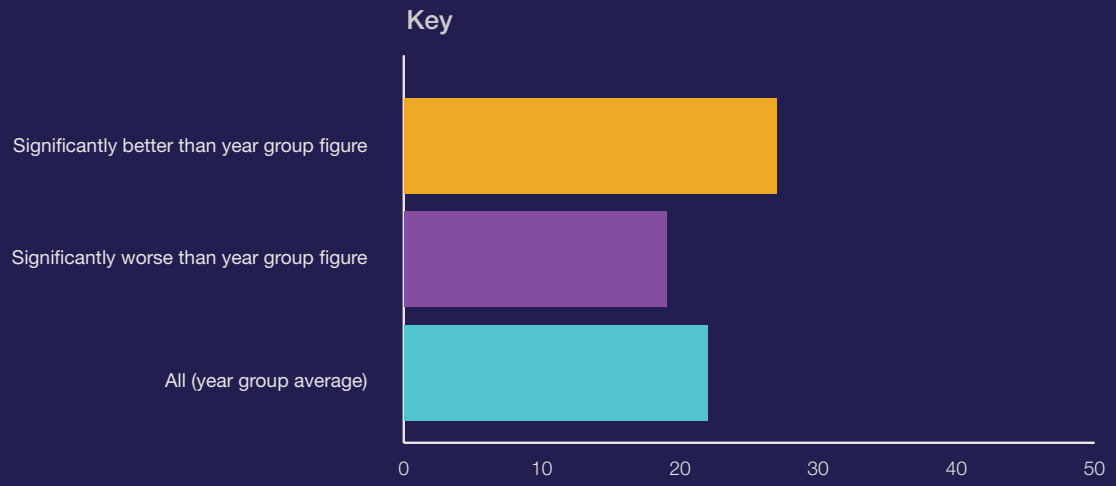

Significantly more likely to:

- Have seen the school nurse for advice or support
- Have been drunk
- Know where to get condoms free of charge
- Have been the victim of crime or violence in the last 12 months
- Have used tobacco pouches

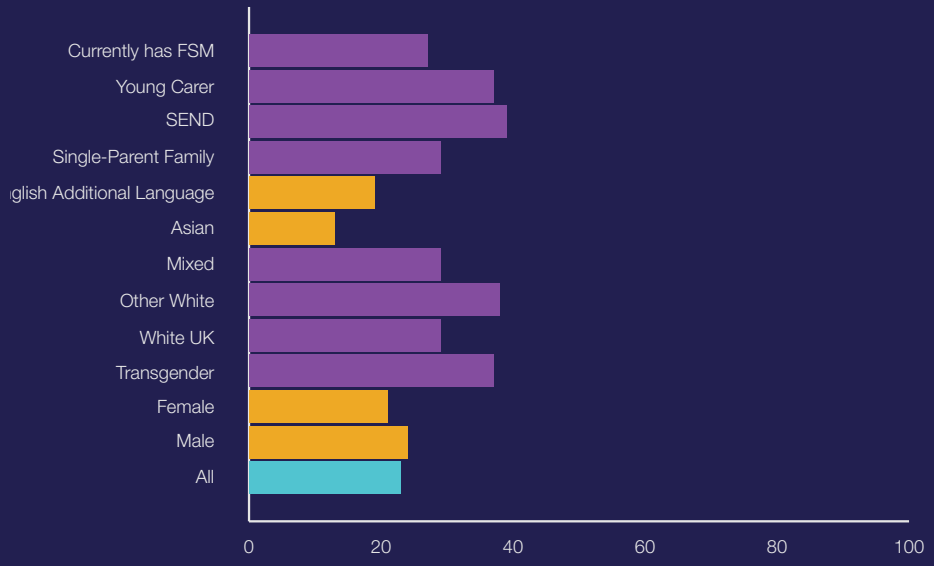

INEQUALITIES

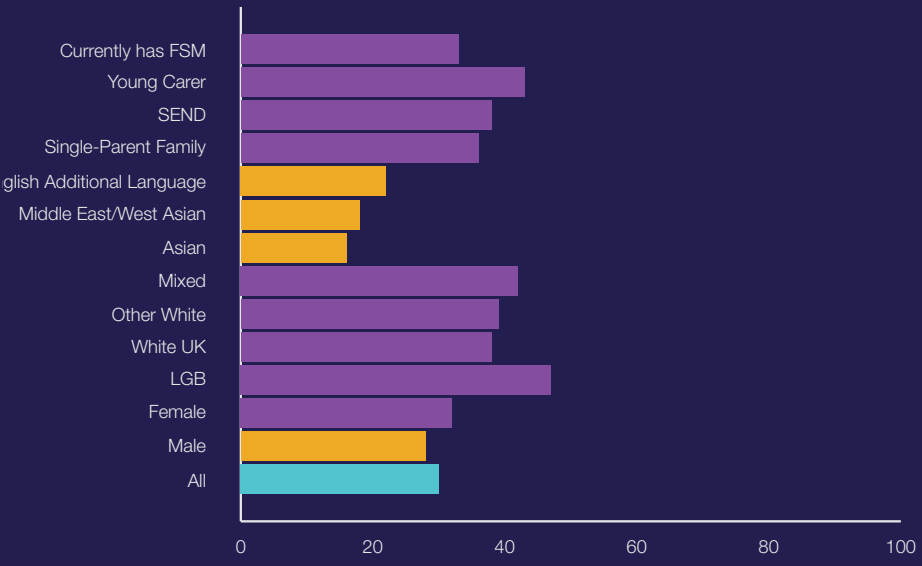

Selected questions from the secondary questionnaires were analysed to identify statistically significant differences between population groups.

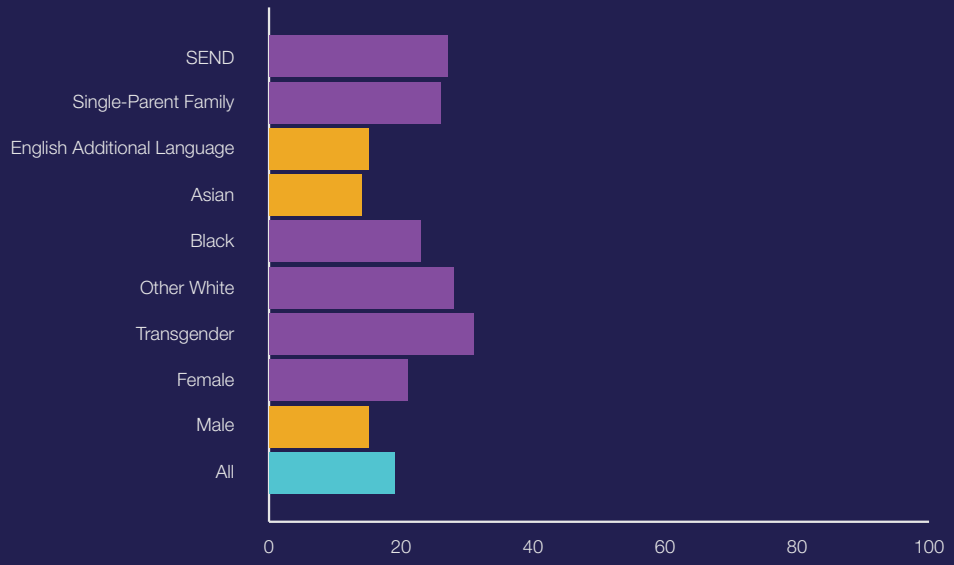

Percentage of Year 8 who have experienced controlling partner behaviour

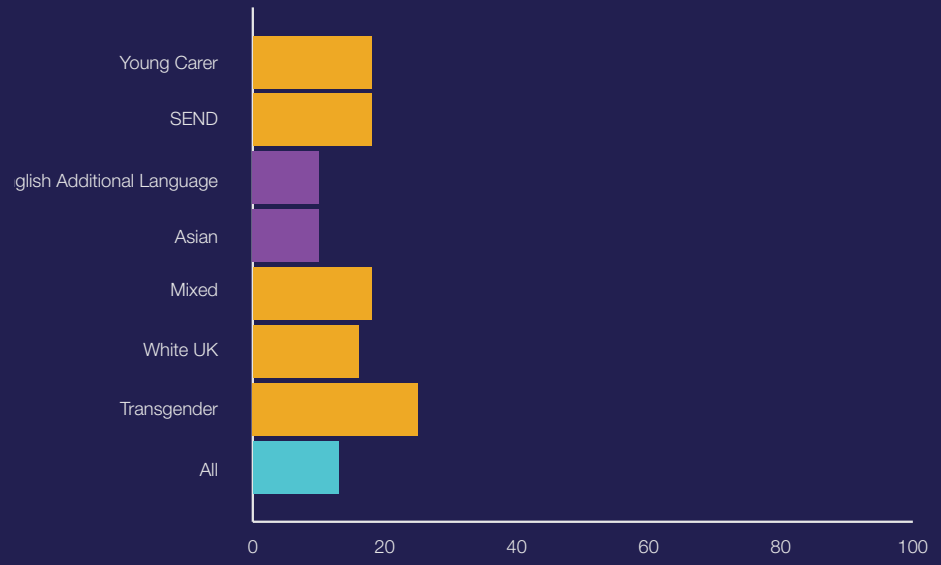

Percentage of Year 10 who have experienced controlling partner behaviour

Percentage of Year 8 who have been sexually harassed

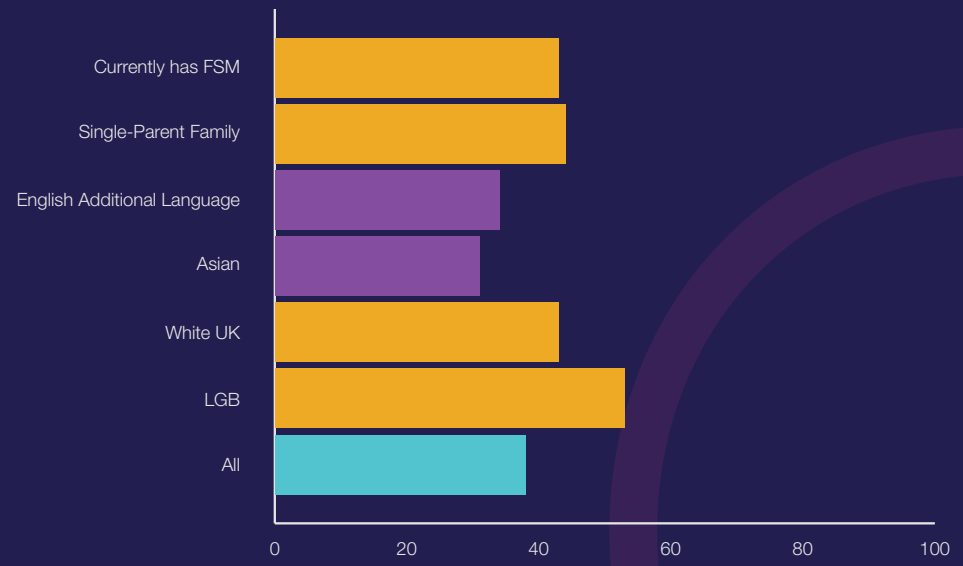

Percentage of Year 8 who know where to get free condoms

Percentage of Year 10 who have been sexually harassed

Percentage of Year 10 who know where to get free condoms

The table below shows percentages for selected criteria for the whole year group sample and selected sub-samples of young people who may be vulnerable.

The table shows significance testing; the tests were performed using actual numbers of respondents for each criterion, not the overall sample size shown.

No correction has been attempted for multiple comparisons, so we could expect 1 in 20 cells to show an apparently significant difference by chance alone. However, there are 96 cells, 34 of which show a significant result, 18 at $p < 0.01$; this greatly exceeds expectations.

99	99	$p < 0.05$ Purple = Higher on a positive criterion or lower on a negative one
99	99	$p < 0.01$ Orange = Lower on a positive criterion or higher on a negative one

THE 2026 SAMPLE

Teachers received guidance from Schools Health Education Unit staff to support consistent and reliable data collection. Schools were offered the option to complete the survey online through a bespoke website, with paper questionnaires provided where technical issues prevented online participation. A total of 12,942 pupils took part in the 2026 HRBS, including pupils from 23 Key Stage 1 settings, 57 Key Stage 2 settings, 16 secondary (Key Stage 3-4) settings, three institutions completing the Year 12+ survey, and nine institutions participating in the SEND survey.

Each participating school received an individual report comparing its results with the combined results for pupils in the same age group.

School Year	Year 2	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10	Year 11	Year 12+	Total
Boys	395	1,106	250	1,162	440	1,058	337	929	140	290	6,107
Girls	391	1,117	271	1,189	402	1,112	461	846	99	226	6,114
Total	**798**	**2,279**	**536**	**2,416**	**854**	**2,225**	**817**	**1,835**	**246**	**532**	**12,538***

* 317 young people didn't select male or female. 404 students took part in a bespoke special school survey so their results are reported elsewhere.
